DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 7/26/07.

Accordingly, claims 1-4 and 7-10 are currently pending; and claims 5, 6 and 11-21 are canceled.

REASONS FOR ALLOWANCE

2. Claims 1-4 and 7-10 are allowed.
3. The following is an examiner's statement of reasons for allowance:

-Regarding independent claim 1, none of prior art of record teaches or suggests a mobile communication system, as claimed. Jone et al (6,108,314) in view of Fisher et al (6,936,936) and Fouladpour (6,608,264), previously cited, teaches the claimed mobile communication system except either one or combination of them at least fails to teach that the mobile communication system comprises a router wherein the router includes communication components only for wireless communications with personal-use computing devices through at least one antenna, the router being configured to communicate with PCMCIA cards through the at least one antenna. In Jone et al system in view of Fisher et al and Fouladpour, the router does not

communicate with PCMCIA cards through its antenna. It would not have been obvious for one skilled in the art to additionally implement Jone et al system in view of Fisher et al and Fouladpour, in such a way that the router would communicate with PCMCIA cards through its antenna, for leading such the implementation to the claimed invention.

—Regarding independent claim 9, none of prior art of record teaches or suggests a mobile communication system, as claimed. Jone et al in view of Fisher et al and Fouladpour teaches the claimed mobile communication system except either one or combination of them at least fails to teach that the mobile communication system comprises cabling configured to coupled a power adapter to a router to provide output power from the power adapter to the router wherein the cabling includes a USB cable that includes a male USB connector at a first end for coupling to a USB port of the power adapter, and includes a splitter at a second end with at least two female USB ports; and a power cable that includes a male USB connector on a first end of the power cable configured to be inserted in one of the female USB ports of the USB cable,

and includes a female power connector on a second end of the power cable, the female power connector configured to be inserted into a power port of the router. In Jone et al in view of Fisher et al and Fouladpour, the cabling lacks of such a USB cable and such a power cable. It would not have been obvious for one skilled in the art to implement Jone et al system in view of Fisher et al and Fouladpour with such a USB cable and such a power cable for leading the implementation to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
